

AI Scavenger Hunt

Find the hidden AI in your everyday life this week

ALL AGES

TAKE-HOME

ONE WEEK

The Challenge

AI is hiding all around you, in your home, your car, even your backpack. This week, see how many of these you can find! Check the box when you spot one, and write a sentence about where you found it. Try to find at least 8 out of 15 to complete the hunt.

Found It?	AI Sighting	Where Did You See It?
☐	A voice assistant (Siri, Alexa, Google Assistant) that responds when you talk to it	
☐	A streaming recommendation a show or video suggested to you based on what you've watched before	
☐	A spam filter catching a junk email before it reaches your inbox	
☐	Photo auto-tagging your phone automatically recognizing faces or objects in a photo	
☐	A smart thermostat or smart light that adjusts automatically	
☐	Predictive text your phone guessing the next word as you type	
☐	A navigation app rerouting Google Maps or Waze suggesting a faster route due to traffic	
☐	A chatbot a customer service chat window that responds instantly	

Found It?	AI Sighting	Where Did You See It?
☐	Face unlock or fingerprint unlock on a phone or tablet	
☐	A smart traffic signal that seems to change based on which cars are waiting (look closely at a real intersection!)	
☐	An online store recommendation 'customers who bought this also bought...'	
☐	Auto-correct catching and fixing a typo as you write	
☐	A fraud alert your bank texting you about an unusual purchase	
☐	A self-checkout or AI-powered camera at a grocery store	
☐	Music recommendations a playlist that seems to know your taste	

Reflect

How many did you find? _____ out of 15

Which one surprised you most?

Pick one item you found. What do you think would happen if that AI made a mistake?

For Families

This is a great activity to do together, talk through each discovery as a family. There's no wrong answer; the goal is simply to notice how often AI already shapes daily life, long before self-driving cars or robots.
